Un Cuento Para Los Niños

Proyecto #2

8th Grade

In this project, you are going to memorize a portion of a children's story. You are going to tell the story to the class while showing a power point presentation with pictures of the story.

PROCESS

Step One: You will be given a portion of a story to memorize.

Step Two: Memorize the story on your own and in groups, in class. Spend time focusing on pronunciation.

Step Three: Create a title page which includes the title, author's name, and appropriate picture.

Step Four: Create a dedication page. This is page two of your project. Use at least three sentences, in Spanish, and dedicate the telling of your story to someone.

Step Five: Create at least ten more power point pages to illustrate the telling of your story. Each page should have an appropriate picture and descriptive title. (Example: La Casa de Pablo.) The pages do NOT have the words that you have memorized on them. All words are in Spanish.
